Quality • Strength • Value

- M&S is 100% Australian owned and has been operating since 1972.
- M&S sheds are designed by registered professional engineers for strength and durability. They comply with Australian design standards, building codes and ASI guidelines.
- M&S sheds are manufactured from quality steel products and come with a warranty.
- M&S offers a huge range of standard steel buildings and custom designs and has experienced installers ready to construct your shed.
- M&S customer service staff are industry trained and can provide a complete turn-key service, including document preparation for local government approval.

The M&S difference

- All possible building design options are available from M&S to achieve the best solution:
 - Structural Steel
 - Welded Portals
 - Plated Portals
 - Stud Panel Frames
- The M&S garage range has a rebated concrete slab design to help keep water and vermin out, flashings with safety in mind, wide choice of colours to match existing buildings, heavy roof and wall sheeting and wide roller doors for ease of access.
- All sheds can be bought as kit only or as a complete package, with M&S supplying a professional slab and build service.
